**IN THE CLAIMS**

Cancel claims 33-36.

Add new claims 39-42 as follows:

1-36. (canceled)

37. (currently amended): A self-service terminal comprising:

a port for outputting transaction details to a user;

means for determining if the user has previously requested to receive a current news article when receiving transaction details;

means for accessing a current news article from a repository providing news articles;

means for appending the ~~obtained~~ current news article obtained to transaction details; and

means for delivering the transaction details and the appended current news article to the user via the port, so that the user automatically receives a current news article if the user has previously requested such a service.

38. (currently amended): A method of operating a self-service terminal, the method comprising:

determining if a user has previously requested to receive a current news article when receiving self-service transaction details;

accessing a current news article from a repository providing news articles;

appending the ~~obtained~~ current news article obtained to self-service transaction details; and

delivering the self-service transaction details and the appended current news article to the user so that the user automatically receives a current news article if the user has previously requested such a service.

39. (new): A self-service terminal comprising:  
a port for outputting transaction details to a user;  
means for determining if the user has previously requested to receive a current stock price of a company when receiving transaction details;  
means for accessing a current stock price of the company from a repository providing stock prices of companies;  
means for appending the current stock price obtained to transaction details;  
and  
means for delivering the transaction details and the appended current stock price to the user via the port, so that the user automatically receives a current stock price of the company if the user has previously requested such a service.
40. (new): A method of operating a self-service terminal, the method comprising:  
determining if a user has previously requested to receive a current stock price of a company when receiving self-service transaction details;  
accessing a current stock price of the company from a repository providing stock prices of companies;  
appending the current stock price obtained to self-service transaction details;  
and  
delivering the self-service transaction details and the appended current stock price to the user so that the user automatically receives a current stock price of the company if the user has previously requested such a service.
41. (new): A self-service terminal comprising:  
a port for outputting transaction details to a user;  
means for determining if the user has previously requested to receive a current exchange rate between two currencies when receiving transaction details;  
means for accessing a current exchange rate between the two currencies from a repository providing exchange rates;

09/871,928

means for appending the current exchange rate obtained to transaction details;  
and

means for delivering the transaction details and the appended current exchange rate to the user via the port, so that the user automatically receives a current exchange rate between the two currencies if the user has previously requested such a service.

42. (new): A method of operating a self-service terminal, the method comprising:
- determining if a user has previously requested to receive a current exchange rate between two currencies when receiving self-service transaction details;
  - accessing a current exchange rate between the two currencies from a repository providing exchange rates;
  - appending the current exchange rate obtained to self-service transaction details; and
  - delivering the self-service transaction details and the appended current exchange rate to the user so that the user automatically receives a current exchange rate between the two currencies if the user has previously requested such a service.
